

the FCC should not implement
any proposal that would lessen
Indiana's Telephone Privacy law
protections.

It has improved our peronal a time at home ...evening are not being interupted
every 1/2 hour

"I used to receive more than 12 calls per
week, now I have hardly ever gotten one call that wasn't suppose to
actually for us (family call)

please don't change this....It nice not to have the interuption of your life
only to answer the phone to find out the telemarketer has several lines ringing
at once and there is no one to answer you when you pick up phone because they
are talking to someone else that had picked up the phone before you did.... then
they are ringing back in the next 10 minutes and it starts all over again
